Software Engineer

► PROFESSIONAL EXPERIENCE

Jun 2011 - Present

LTU technologies

Research engineer at [LTU technologies](#) in Paris (France).

Working in the Algorithm team on image matching, similarity and performance tuning on large scale databases (millions of images).

Mainly working in C++ and keeping myself updated in the latest advancements in C++ (compilers, standards) to see how we can improve our code base. Advocate for development best practices: code review, code quality, release management, ...

Development of iOS applications to showcase our image recognition technology.

Jan 2010 - Jun 2011

Software engineer at Nokia [Qt Development Frameworks](#) in Oslo (Norway).

Worked in the Graphic team on the graphics system raster. Optimized the software rasterizer for CoreGraphics.

Worked on the Mac OS X port of Qt in general, keeping it updated with the latest Mac technologies (FSEvents, unified toolbar, ...) to make Qt applications blend on Mac OS X.

Feb 2009 - Oct 2009

Research engineer at the [Gustave Roussy Institute](#) in Villejuif (France) on the Mélimage project in collaboration with the [LRDE](#). Worked on a unified platform for medical imaging involving segmentation and registration with heterogeneous data.

Development of the [Olena platform](#) for the needs of the Mélimage project (speed optimizations, specific I/O like DICOM format, ...).

Feb 2008 - Aug 2008

Intern at Siemens Corporate Research in Princeton (New Jersey, USA).

Worked on [XIP](#), an image processing platform used in the medical field, extending the network and multithreading capabilities. Ported it to UNIX (Mac OS X & Linux).

Sept 2007 - Jan 2008

Teacher assistant at [EPITA](#): teaching C and C++ to third year student, elaboration of projects, ...

► EDUCATION

2003 - 2008

Graduated from [EPITA](#) in Paris, a five year degree course equivalent to a Master of Science in computer science and engineering with two years of intense undergraduate study. Majored in cognitive science and artificial intelligence.

► SKILLS

General:

Computer vision, image processing, machine learning, SIMD, ...

OS:

UNIX (Linux, *BSD), Mac OS X, iOS

Prog. languages:

C/C++, Python, Objective-C/Swift, OCaml, Go

Frameworks:

Cocoa, Qt, OpenCV, Boost, scikit-learn

Tools:

vim, emacs, git, valgrind, gdb, subversion, Qt Creator, Apple Dev Tools (Xcode, Instruments, ...)

Languages:

English (fluent), French (native language)
